Lautaro López

La Plata, Argentina | Website | Linkedin | Github | hi@lautarolopez.tech

Professional Summary

Senior-level React / TypeScript engineer with 5+ years building production web applications and delivering features end-to-end, from product and UX discussions to frontend, backend, and deployment. Professional Java experience and hands-on collaboration on AWS Bedrock-powered resume parsing and improvement, including architecture decisions and prompt iteration. Experienced with AI-assisted software development workflows using Cursor agents..

Technical Skills

Frontend: React, TypeScript, JavaScript, Next.js, SSR, Tailwind CSS, Material UI, Redux, TanStack Query
Backend: Java, Node.js, Express, Laravel, REST APIs, microservices, PostgreSQL, MySQL
AI & Cloud: AWS Bedrock, LLM integration, prompt iteration, Cursor agents, AWS Lambda, S3, Docker, CI/CD
Engineering: Frontend architecture, custom hooks, state management, accessibility, testing, design systems

Professional Experience

Kubikware - *React/Node/Laravel Developer* | Remote | January 2024 - Present

- Design and deliver features end-to-end for HelloHive, contributing from product and UX decisions through technical architecture, backend, and frontend implementation.
- Develop complex React and TypeScript interfaces and reusable components for an AI-enabled resume and career platform.
- Collaborated on the architecture and implementation of AWS Bedrock resume parsing and improvement features, contributing to LLM workflow decisions and prompt refinement.
- Build and integrate Laravel and Node.js services and AWS-backed document workflows; contribute to frontend architecture, accessibility, and testing.

Symfa - *React/Node Developer* | Remote | October 2022 - October 2023

- Contributed to migration of a Reynolds American PWA toward React; improved accessibility and maintained TypeScript/JavaScript functionality across frontend and AWS Lambda services.
- Developed and maintained internal React applications and worked with PostgreSQL-backed services.

Tapi and Payana (former Tap Billetera) - *React/Node Developer* | Remote | December 2021 - October 2022

- Developed JavaScript microservices for a digital wallet, including transaction and user fraud-prevention rules.
- Helped design Payana's application architecture and implement features across its React frontend and backend services.

Softtek - *React/Node Developer* | Remote | August 2021 - December 2021

- Built React/TypeScript enrollment and back-office features for OSDE; integrated with Express and NestJS services.

BPMX - *Java Developer* | Remote | November 2020 - August 2021

- Maintained and extended a proprietary Java / Gradle framework used to generate business process management experiences; implemented custom solutions to developer needs.
- Also contributed to the company's React-based website.

Education and Languages

Universidad Nacional de La Plata | *Computer Engineering* | 2016 – Present
Digital House | *Full-Stack Web Development* | 2019 – 2020
Languages: Spanish (native), English (C2 / proficient, EF SET)
